EMERGENCY DISCHARGE SUMMARY
Document ID: 60000000-0000-0000-0000-000000000014
Date: 17/01/2024

PATIENT INFORMATION

Patient ID: 20000000-0000-0000-0000-000000000005
Patient Name: Kabir Malhotra
DOB: 1974-09-09
Gender: Male
Blood Group: O-
Phone: 9100000005
Address: Mumbai, Maharashtra

CLINICAL COURSE

Emergency admission for bacterial pneumonia.
Known history of severe Penicillin allergy (confirmed anaphylaxis).
Treated with Levofloxacin 500 mg IV OD (avoiding beta-lactams due to allergy).

During hospitalization, patient reported experiencing facial swelling and mild urticaria approximately 2 hours after receiving a dose of a combination medication that was later found to contain amoxicillin (a penicillin-class antibiotic).
The reaction was managed with antihistamines and the medication was discontinued immediately.

Possible hypersensitivity reaction following inadvertent exposure to an amoxicillin-containing medication.
This possible allergy-related finding requires further evaluation.
Reported reaction - NOT CONFIRMED as a new allergy.
Recommend allergy/immunology consultation for formal assessment.
